WE'RE OFF . . . AND RUNNING STRONG!

May, 1965, a Month to Remember, Marks Official Start of Solicitation for Phase I of $56,000,000 Program

The $56 million expansion plans of the Medical Center envision seven new buildings and a great new complex of medical facilities. More doctors can be trained, a broader-based and more effective service can be extended to citizens in the vital areas of physical health and mental well-being, and a tremendous contribution can thus be made to the Boston community, the Commonwealth of Massachusetts and to our country.

But, this is a large order! And since it is of the essence to begin with a graspable goal, the 10-year, long-range plan for growth and expansion will be launched with an immediate and intensive effort to meet the most pressing needs of the Medical School. Phase I, now dramatically launched, and to be achieved by the end of 1966, represents this first and urgently practical 2-year drive towards the Medical Center of the future.

Phase I, the immediate objectives for 1965-66, totals nearly 20 million dollars.

At the top of the list of Phase I priorities is a new instructional building. This unit must be built — and soon — if the present graduating class of 72 students is to be increased to 96, and if the BUSM is to continue to draw superior students and faculty. The proposed structure, to be erected adjacent to the Research, or “Blue” Building, will cost $6,200,000. It will replace the inadequate and old-fashioned classrooms now housed in small buildings that date from the mid-Victorian era.

The new building, as proposed by Shepley, Bulfinch, Richardson and Abbott, Boston Architects and Engineers, will consist of nine floors. Each floor will total 13,700 square feet of gross space.

Phase I also includes the construction of three additional floors on the present six-story Research Building. These top

The clean-cut, functional building below is the architects' visualization of the proposed new instructional unit for the BUSM. It is a far cry from the collection of small brick buildings which have served as classroom space since 1875.
three floors will house an inter-disciplinary Institute of Development Biology, which will conduct research into the scientific development of man from the embryonic stage. This Institute of Development Biology is estimated to cost $1,700,000.

Other vital facilities on the “immediate objective”, 1965-66, list are the Radiation Research and Therapy Center (the Cancer Therapy Center); the School of Graduate Dentistry; the Auditorium; the Library; and the Mental Health Center (to rise on the site of the now-demolished Stoughton Street National Guard Armory).

Faculty expansion and support are also an essential part of Phase I of the long-range plan. The Radiation Research and Therapy Center, towards which the American Cancer Society has already contributed $500,000, will cost an estimated $1,200,000. The Cancer Society grant makes possible the acquisition of a 42 million energy volt Betatron, the only one of its kind in the United States, and one of only two in the world. The Betatron will empower BUMC researchers to study tissue at a higher frequency than is possible anywhere else in the country, and it will also enable BUMC doctors to treat certain types of cancer with deep radiation therapy more accurately than has been possible with existent methods. The new Cancer Center will be open to research personnel from other medical schools in the region and to patients who may come to us for help from all over the world.

A new $1,000,000 home for the School of Graduate Dentistry will mean that this unique School, now occupying two small tenements on Newton Street, can transfer its one-of-a-kind teaching activities in the field of graduate dentistry to a more appropriate structure. An Auditorium and Library, to cost $267,000 and $945,000 respectively, will be erected to fill a desperate need for both these facilities.

Plans for the $8,000,000 Mental Health Center are well under way. To be financed by the Commonwealth and jointly administered by the Massachusetts Department of Mental Health and our own BUMC Division of Psychiatry, the Center will provide a modern mental health program for the South End and adjacent areas. Both inpatient and outpatient care will be available, in addition to pastoral counseling, a home-visiting clinic and a 24-hour emergency clinic. The Mental Health Center will perpetuate and extend the BUSM’s long-standing concern for the people of the South End, expressed for over 90 years in its pioneering Home Medical Service.

OUTSTANDING GIFTS TO THE BUMC ARE EVIDENCE OF STRONG SUPPORT

In demonstration of a heartening faith in the BUMC development program, the following organizations have already pledged substantial gifts: The American Cancer Society, the Avalon Foundation of New York, the Richard King Mellon Trust, the Gillette Company, the Permanent Charity Fund, and the officers of University Hospital.

Massachusetts Division, American Cancer Society

Phase I of the BUMC Development Program received its first great lift with the $500,000 grant announced last fall by the Massachusetts Division of the American Cancer Society. The award was made at the 19th Annual Meeting of the Massachusetts organization, held in the Sherman Union Building of the University, with a distinguished group in attendance. Society President, Dr. Thomas W. Botsford, in presenting the gift, stated that the grant was to make possible the establishment of a Radiation Research and Therapy Center, and to provide for the acquisition of the world’s most powerful and the only high energy betatron, designed especially for medical science.

The new center will be located in the Blue Research Building.

Avalon Foundation

This New York-based foundation, created by Mrs. Ailsa Mellon Bruce in 1910 to support community, youth and educational programs, has extended its support in recent years principally to medical education.

In January of this year they made a gift of $200,000 to the School of Medicine to expand and strengthen the faculty and to meet the needs of increased enrollment.

The gift, which is for a four-year period, will be paid to the BUMC in equal yearly installments.

The Richard King Mellon Trust

This trust, created in 1947, also contributed $200,000 in January, 1965, to benefit the BUSM faculty, because their “findings indicated that there are relatively more funds available today for medical research and physical facilities than there are for adequate salaries for competent teachers on the permanent faculty staffs.”

The Gillette Company

The Gillette Company has made an unrestricted gift of $100,000 to the Development Program of the BUMC.

The Permanent Charity Fund

A gift of $100,000 has been made by the Permanent Charity Fund of Boston to be used for the top priority project of Phase I, the Instructional Building.

University Hospital Officers

The officers of the University Hospital, partner in the BUMC, have given, as individuals, $200,000 towards the Instructional Building.
BOONE GROSS NAMED TO HEAD CORPORATE GIFTS

Boone Gross, a Trustee of University Hospital, and since 1958 President of the Gillette Company, has agreed to head the division of corporate giving of the Development Fund Campaign.

Mr. Gross, who grew up in Lansing, Michigan, graduated in 1926 from the United States Military Academy (West Point). He served as a Second Lieutenant in the Corps of Engineers from 1926 to 1929, when he entered upon his business career. During World War II he served between '42 and '45 in the U.S. Army, holding the ranks of Major to Colonel.

After a four-year affiliation with the Motor Wheel Corporation of Lansing, Michigan, Mr. Gross went to Hiram Walker, Inc. of Walkerville, Ontario, in 1934. From 1939 to 1942 he was President of Gooderham and Worts, a subsidiary of Hiram Walker, and after his war service joined the Gillette Safety Razor Company as General Sales Manager. In 1952 he was named president of this Division, and in 1958 became president of the parent firm, the Gillette Company.

Mr. Gross is a Director of the First National Bank of Boston, the B. F. Goodrich Company and P. R. Mallory & Company. He is a Trustee of the American Optical Company and Employers Group Associates, Boston. His civic responsibilities include active service as Overseer of the Boston Boys' Clubs, Trustee of the University Hospital and Trustee of the Boston Museum of Science.

The Grosses make their home at 200 Kent Road, Waban, Massachusetts, and also maintain a winter house in Scottsdale, Arizona. Son Boone, Jr. and daughter Adelaide (Mrs. Joseph Rudberg) have presented Mr. Gross and his wife with grandchildren. Their younger daughter, Mary Juliette, is a student at Hollins College. Young Gregory, 14, is still at home.

One of the first events in this kick-off month of May was the Rhode Island Workers’ meeting, held on May 2 in the home of Dr. and Mrs. Nathan Chaset (seated.) Drs. Harry Cicma, Class of 1924, and Paul LaMarche, Class of 1960, shown with the Chasets, represent the wide range of BUSM classes in the group of 20 who participated in the lively meeting. They are admiring the campaign instruction booklet: “It All Depends on You.”

and the Medical Center and the Children’s Hospital Medical Center, and also serves in this capacity for the Brookwood School.

Mrs. Hans Estin is the former Gay Semler of New York City. There are two small daughters, Hilary, 6, and Alexandra, whose age is still measured in months. The Estins live on Summer Street in Manchester, Massachusetts.

Mr. Estin is active in sports as well as in “good works.” He skis, plays tennis and golf. His clubs include the Myopia Hunt and the Union Club of Boston.

BOONE GROSS . . .

A chief enthusiasm for Mr. Gross is golf; he plays at the Brae Burn Country Club here, and at clubs in Scottsdale and Carefree, Arizona, when he can “go West”. Other clubs are the Algonquin Club, Union Club of Boston, the Northport Country Club, Michigan, and the Racquet Club of Chicago.

“Fellows of BUMC”

In recognition of a gift of $50,000 or more the Trustees have established a plan to designate the donor a “Fellow of the Boston University Medical Center.” Those who give between $25,000 and $50,000 will receive the title of Associate-Fellow.

An Annual dinner will be held for the formal induction of these donors into the Fellowship of the BUMC.
