I. Introduction. Statement of the problem.

During the last twenty years there has been a constantly increasing interest in the establishment and development of libraries in the schools of the United States. To one who has not been in touch with the earlier movements for school libraries, this interest must seem to be of a sudden and amazing growth. Pedagogical and library periodicals of a quarter of a century ago contain very few articles on the subject and show little conception of the value of the school library in contributing to and supplementing the work of every department. Today these periodicals no longer attempt to prove that a library is essential or discuss at length the value to be derived from its use in the English or History Department. These are accepted facts and arguments are unneeded. We find instead that our librarians and educators of today are concerned with the numerous administrative problems which confront the school librarian, with the qualifications and training which the school librarian should have, with the question of certification, and the ways and means by which the library may function still more effectively in connection with the newer methods in education and in the newer types of schools.

Before the opening of the first school library there had to come to school authorities a realization that more books were needed, and that a well-chosen collection should be placed in the school building within easy access of teachers and pupils. This idea seems to have been of slow growth until several factors appeared which have contributed to its development and have helped to bring about

The history of the United States is a story of growth and change. From the first European settlers to the present day, the nation has expanded its territory and diversified its economy. The American dream of freedom and opportunity has attracted millions of immigrants from around the world. The struggle for civil rights and social justice has shaped the nation's character and values. The United States has played a leading role in world affairs, promoting democracy and human rights. Despite challenges and setbacks, the United States remains a beacon of hope and a force for good in the world.

as important as the library in the senior high school, indeed far more so in many respects. Most boys and girls leave school before they reach the senior high school, in fact before they reach the eighth grade of the public schools. If we are really to teach them the use of the library, if we are really to create in them an interest in good books, an interest in study, it must be done in the junior high school. In my mind the need of library development applies in particular to the junior high school."<sup>1</sup>

Here and there, in certain large cities, notably Detroit, Pittsburgh, Cleveland and Portland, Ore., we find that beginnings are being made in the establishment of libraries in the elementary grade school buildings. Although the field is practically untouched as yet, the general interest has been keen enough to bring forth several books<sup>2</sup> on the subject and standards are being worked out for the administration and equipment<sup>3</sup> of these libraries. It is certain that there will be a great expansion in this type of school library, for wherever the platoon school system is introduced, the elementary school library follows.<sup>4</sup>

its general acceptance in the last few years as a requisite in all progressive school systems. Two influences in particular may be mentioned as chief contributory causes: the growth of work with children in our public libraries with the resultant consciousness of the importance of forming right reading habits in youth, and the changes which have taken place in the teaching objectives and methods whereby the use of a single text-book is no longer deemed sufficient but must be supplemented and enriched by the use of reference material and by the reading of many books. "The modern high school course has ceased to be a college preparatory institution and is becoming a place where the youth of our democracy may obtain a liberal education combined with the preparation for a specific vocation and the assumption that students will need that many-sided development which only a curriculum of studies made up from all aspects of modern life can provide. In the new scheme of things the library is indispensable."<sup>1</sup>

Starting as an experiment, the library has now become a part of the regular equipment of the senior high school, "a tool ready for intimate day by day service."<sup>2</sup> Standards have already been formulated by the National Education Association and the American Library Association which have been accepted by the several regional associations and by many state departments of education.

Junior high schools, too, are quite generally looking forward to the providing of library facilities for their pupils, for it is acknowledged that "The library in the junior high school is just

Faint, illegible text covering the page, likely bleed-through from the reverse side of the document.

In this study, the writer is limiting herself almost entirely to the consideration of the status of the library in the public high school, the history of the school library movement in its various phases, in so far as it helps in understanding the school library of the present, the standards and regulations for high school libraries which have been adopted by various state systems and, in particular, the high school library as it is to be found in the public high schools of Massachusetts.

In making this study the writer has examined many more books, periodicals and pamphlets than can be listed and has drawn also upon her own library experience in several cities. For the last section of the report, that dealing with the high school library of Massachusetts, she has, through the courtesy of the State Department of Education, been able to use the questionnaire sent out to every school in the state and containing information as of January 1, 1931.

## II Historical Sketch of the Development of School Libraries.

### A. The First Phase of School Library Work: The School District Library.

Strictly speaking the school district library as it was to be found in the first half of the nineteenth century ought not to be classed with the school library of the twentieth century. However, these libraries, like our present school libraries, were collections of books, housed in school buildings, under school supervision, and used by the teachers and pupils of the school. They were planned also for the use of adults of the district and, serving this dual purpose, they became, as it were, the ancestor of both the school library and the community public library. Without them the development of the school library would most certainly have been slower and less wide spread. For this reason, if we wish to have a clear understanding of the whole movement, it is necessary to know something of the early legislation for the school district libraries.

The idea was conceived in New York and the first agitation for libraries dates back to the early years of the nineteenth century, when, in 1812, Governor Daniel I. Tompkins in his annual message to the state legislature "called attention to the importance of a judicious selection of books for the use in the schools."<sup>1</sup> At this time there was no response to his appeal, due perhaps to the outbreak of the War of 1812, but the seed had been sown and fifteen years later, in 1827,<sup>2</sup> Governor DeWitt

Clinton again suggested that books were needed in the schools and proposed that a small library be placed in every school house. In 1835<sup>1</sup> a permissive law was passed by which the taxpayers of any district were allowed to levy a tax of \$20 in order to start a library and an annual tax of \$10 to maintain it. Knowing and caring little about libraries, few districts took the opportunity offered them and so, in 1838, upon the recommendation of Governor Marcy, General John Dix, then Secretary of State, "was charged with the execution of the law, giving to the school districts \$55,000 a year for the purpose of buying books for their libraries and requiring them to raise by taxation an amount equal to their grant for the same purpose." The period from 1838 to 1851 was one in which libraries grew rapidly and at its close the schools reported having in their possession, collections totaling more than 1,600,000 volumes.<sup>2</sup> But in that year the legislature passed a new law whereby the appropriation might be diverted into other channels, the purchase of equipment or the salaries of teachers. Fewer books were bought and dissatisfaction became general. In 1875, the Superintendent of Schools reported, "The system has not worked well in this state. The libraries have fallen into disuse and have become practically valueless." Gradually conditions began to improve and in 1892 the state undertook to reorganize and rehabilitate these "school libraries." For the first time the school district library, except in remote rural sections of the state, became a real school library with a

collection confined to reference books and pedagogical books for the help of the teachers and to supplementary reading matter for the children.<sup>1</sup>

New York was the first state to show an active interest in the establishment of libraries in its schools but other states were not far behind in following its example. In 1835 the Michigan state constitution contained a provision by which a library in every township might be provided by the legislature and in 1837 the state again went on record as favoring a library in every school district.<sup>2</sup> Under the wise leadership of Horace Mann,<sup>3</sup> Massachusetts was always well in advance in educational matters. At his instigation a law was passed on April 12, 1837, authorizing "each school district to raise by tax a sum not exceeding \$30 for the first year and \$10 for any subsequent year for the purchase of a library and apparatus for the school. Few availed themselves of the privilege and in 1839 there were but fifty libraries in all the schools of Massachusetts of which fifteen were in Boston."<sup>3</sup> In 1842 another act was passed which offered a bounty of \$15 to every district which raised an equal amount for a school library but the plan was never very successful and after twelve years there were only 42,707<sup>4</sup> volumes in the school libraries. Within the next ten years

Connecticut, Rhode Island, Iowa, Indiana, Maine, New Hampshire, Ohio, Wisconsin, Missouri, Oregon and Illinois had passed similar library laws. There was little legislation for libraries during the Civil War period but, later, interest revived and by 1921 forty-four states had library legislation.<sup>1</sup>

The earlier laws were well meaning but the results were nearly negligible for many years because of the failure to realize that it was necessary to exercise care and wisdom in the selection of the books, in their preparation and in their distribution. The United States Commissioner of Education reported in 1876, "These collections have been multiplied until now there is hardly a school of any kind, seminary, normal school, commercial school or other higher school, public or private, without its library.....Most of the collections belonging to these schools in the different states are of a miscellaneous character mainly consisting of gifts of individuals. The schools are for the most part without special library funds; although in many instances means have been afforded to make the selections that would aid students in their course of study."<sup>2</sup>

The later legislation has eliminated many of the faults of the earlier laws and in most cases provides for supervision and for some degree of standardization.

## II B. A Second Phase of School Library Work: Cooperation between the Public School and the Public Library.

Meanwhile, aided by these laws, public libraries were becoming more numerous in all of our towns and cities and remarkable changes were taking place in their ideals of service. "The old library was passiv, asleep, a reservoir or cistern, getting in but not giving out, an arsenal in time of peace; the librarian a sentinel before the doors, a jailer to gard against the escape of the unfortunates under his care. The new library is activ, an aggressiv, educating force in the community, a living fountain of good influences, an army in the field with all guns limbered."<sup>1</sup>

The year, 1876, is a significant one in American library history for it marks the founding of the American Library Association, the real beginning of the modern library movement. In that same year was recorded what seems to have been the first public suggestion that both schools and libraries are working toward the same end and that the two institutions would mutually benefit through cooperation.<sup>2</sup> Charles Francis Adams, Jr., trustee of the Quincy Public Library, in an address before the teachers of Quincy stressed the fact that the true

aim of education is not to learn to answer questions only, to limit knowledge to the one text book, but to prepare children for the greater work of educating themselves when the formal school days are over. "Having started the child by means of what we call a common school course, the process of further self education is to begin. The great means is through books, through much reading of books. But we teach the children to read; we do not teach them how to read. That, the one all-important thing--the great connecting link between the school education and self education, between the means and the end--that one link we make no effort to supply."<sup>1</sup> As an aid toward this he suggested not only that the teachers bring their pupils to the library but also that they take books back with them into their schoolrooms. "To enable you to do this the trustees of the library have adopted a new rule, under which each of your schools may be made practically into a branch library. The master can himself select and take from the library a number of volumes and keep them on his desk for circulation among the scholars under his charge.....You shall have all the books you will care for."<sup>1</sup> With these words was inaugurated the plan of sending books out of the public library into the schools.

The successful carrying out of a similar experiment was first reported in 1879 in an article<sup>2</sup> by S. S. Green, Librarian of the Worcester Public Library. A committee

composed of the librarian, the superintendent of schools, the principal of the normal school and a member of the board of directors of the library, met in the fall of 1878 to discuss the feasibility of increasing the use of library books by the pupils in the seventh, eighth and ninth grades. A plan was evolved in which the library was to issue special cards to the teachers. On one card the teacher was to be permitted to draw twelve books for the use of the children in her room. On the other she was allowed six books for her professional use. Teachers received this plan cordially and availed themselves enthusiastically of their new privileges. The circulation of books at the library increased so greatly that the book collection felt the strain. This, however, the librarian thought would be but temporary for "as the course of studies remains the same or nearly so, year by year, the library will soon have on its shelves books enough to supply adequately the needs of teachers and scholars,"<sup>1</sup> an interesting commentary on the methods used in the schools of the seventies and an amusing contrast to the attitude of the librarians of the present who speak again and again of the constantly increasing demands which are being made upon their book collections by the new curricula. "With the new method of teaching by projects and supervised study, the teachers are continually using the library for their own personal needs and are realizing the value of planning the work so that the children use many

---

[The text on this page is extremely faint and illegible. It appears to be a multi-paragraph document, possibly a letter or a report, but the specific content cannot be discerned.]

books."<sup>1</sup> "With the introduction of the project method of teaching and with its growth each year comes an increased use of the library."<sup>1</sup> "Only books and time are lacking. It would be gratifying if we could have more attractive recreational books."<sup>1</sup> One librarian speaks of the boy who said, while looking for something to read in connection with his economics lesson, "You know the text book is just a start to something beyond."<sup>1</sup> And again, "The Contract Plan of teaching is now in use.....It means such an increased demand for sitting and standing room in the library that it has presented a new set of problems.....The plan has also required a wide selection of books."<sup>2</sup>

From the humble beginning made by the Worcester library, the class room library movement spread westward and by 1882, Chicago, Cincinnati, Buffalo and Indianapolis were using similar methods and cooperation between library and school was well under way.

A few years later Mr. Green tried another experiment,<sup>3</sup> that of sending larger collections, not charged to an individual teacher, into the higher grades. Three years after this at the conference of the American Library Association in 1891,

  - 2) Cleveland Public Library. Fifty-fourth annual report, January 1, 1927-December 31, 1927, p. 74.
  - 3) Rathbone, J. A. Cooperation between libraries and schools; an historical sketch. In Bostwick, A. E. The relationship between the library and the public school, p. 11-22.

The first part of the document is a letter from the Secretary of the State to the Governor, dated the 10th day of January, 1862. The letter is addressed to the Governor and is signed by the Secretary of the State. The letter contains the following text:

Dear Sir: I have the honor to acknowledge the receipt of your letter of the 9th inst. in relation to the application of the State of New York for the admission of the State of New York to the Union. I have the honor to inform you that the same has been referred to the Committee on the subject, and they have reported in favor of the admission of the State of New York to the Union. I have the honor to inform you that the same has been referred to the Committee on the subject, and they have reported in favor of the admission of the State of New York to the Union.

I have the honor to be, Dear Sir, your obedient servant,  
J. B. Thompson, Secretary of the State.

The second part of the document is a report from the Committee on the subject, dated the 10th day of January, 1862. The report is addressed to the Governor and is signed by the Chairman of the Committee. The report contains the following text:

Dear Sir: We have the honor to acknowledge the receipt of your letter of the 9th inst. in relation to the application of the State of New York for the admission of the State of New York to the Union. We have the honor to inform you that we have considered the application and we have reported in favor of the admission of the State of New York to the Union.

We have the honor to be, Dear Sir, your obedient servants,  
J. B. Thompson, Chairman of the Committee.

Mr. William Howard Brett, Librarian of the Cleveland Public Library, reported that during the previous year collections numbering fifty books each had been placed in 61 schools and that there were many applications from the teachers for these libraries.<sup>1</sup> Mr. Utley of the Detroit Library, at the same meeting, told how in Detroit "the high school grades are provided with a list of something like 1500 books.....In the high school grades, the number of copies of each book was designated by the principal and ran from a single book to as high as fifty copies, depending on the size of the classes and the extent of the use desired."<sup>2</sup> Discussion and interest continued until in 1896 the National Education Association approved the petition of Melvil Dewey and other librarians to permit the establishment of a Library Department.<sup>3</sup> The American Library Association, in that same year, appointed a committee to cooperate with the Library Department of the N. E. A.<sup>4</sup>

That these class room libraries have played a most important part in the history of the school library is indisputable for those cities which were leaders in the

beginning have, with few exceptions, remained leaders and in them have been developed some of our finest school libraries. Through the Library Department of the National Education Association and the joint committee of the American Library Association has been made possible a better mutual understanding of each other's aims and needs and potentialities which has resulted in the formulation of standards and ideals toward which to work.

In 1896 the Cleveland Public Library opened a branch in the Central High School, furnishing a librarian and a large deposit of books while the main reference collection was given by the school.<sup>1</sup> This was the first high school library to be maintained under the supervision of a public library in agreement with the board of education and suggested to other city schools the possibility of securing books and a trained librarian when the school authorities would not or could not provide the kind of library needed by the high school.<sup>2</sup> Many of the school libraries started under this plan at the time are still being operated as are the Cleveland High School Libraries, as parts of the city public library system. Some have since been taken over by the school authorities and are now integral parts of the school system, maintaining cordial relations with the other institution.

## II C The Promotion of the School Library by Schoolmen.

At the same time that the cause of school libraries was being furthered by the public library, the schools, themselves were earnestly considering the same subject. Although in general many teachers were content with the old and easier methods and withhold material, there were those who looked into the future and anticipated changes which were soon to come. One of the earliest statements on the subject of school libraries is that made by Superintendent Morgan of West Virginia, who in 1887 wrote,<sup>1</sup> "The establishment of libraries in public schools or under the control of public school authorities, to be used in connection with the work of the public schools is an educational question of increasing importance. There are two facts which seem sufficient grounds for the establishment of these libraries. The first is the evil influence of pernicious literature, everywhere so abundant and made so seductive and attractive to childhood.....The second is the educational value of public libraries.....as a great supplementary factor to the public school itself. The reading habit and taste for good literature are matters of cultivation and the formation of both should be commenced in childhood..... When the time shall come that every child in the public schools shall have the privilege and encouragement of the school library, popular education will have taken a long step forward."

---

1) Libraries for schools. In U. S. Bureau of Education Report, 1887-1888, p. 165.

About 1890 the school library received serious attention from the Committee of Ten of the National Education Association. In its famous report on secondary education was included the recommendation of the History Section, "that a collection of reference books as large as the means of the school allow should be provided for every school; suitable for use in connection with all the historical work done in the school. Every school board which is willing to buy chemical and physical apparatus may be brought to such a state of grace that it will buy reference books."<sup>1</sup> The influence of this report was such that it greatly stimulated interest and many schools organized libraries.

In several places the school board appointed a librarian with some training who could give her entire time and thought to the work of the library instead of being torn between two duties and either closing the library part of the day or leaving it unsupervised.<sup>2</sup> Two of the outstanding libraries organized before 1900 were those in the Central High School of Detroit and in the Central High School of Washington, D. C.<sup>2</sup>

In 1900 the first library school graduate was appointed to a high school library position and by 1905

  - 2) Hall, M. E. Development of the modern high school library. In *Wilson, Martha. School library experience*, p. 67-81.

there were four others in school libraries.<sup>1</sup>

From 1900 to 1910 the number of school libraries increased about one hundred per cent but in many cases their organization was careless and haphazard. As late as 1900 it was possible to say that "many of the books in these libraries were poor, out-of-date books and old text books, poorly quartered, unclassified and neither catalogued nor readily accessible for constant use."<sup>2</sup> "Some were placed in an inadequate class room presided over by a librarian who had neither the professional training nor the educational qualifications necessary for administering a library..... For equipment, the library often had old furniture discarded by the school and wholly unsuited for the purpose."<sup>3</sup>

The following excerpts from books on education and from articles appearing in the National Education Association Proceedings will serve to indicate some of the changes which were taking place in the conception of education and the function of the school library in the educational scheme.

1904.<sup>4</sup> "The expenditures for school libraries should be confined to the purchase of books that are peculiarly school books, appropriate material for the accomplishment of the purposes of the school library. The lines should be tightly

  - 3) Logasa, Hannah. The high school library, p. 24-25.
  - 4) Meleney, C. E. Place of the library in school instruction. In National Education Association Proceedings, 1904, p. 324-330.

drawn against whims that may better be on the catalog of the public library. Many of our school libraries contain books that need not be there; they are superfluous because they are so seldom used and because their presence in the school relieves the readers of the dependence on the public library and prevents the establishment of a desirable relation with the public library. The school or class should not be so large and so extensive in scope as to necessitate the machinery and the services of a trained force of librarians and assistants."

1906.<sup>1</sup> "The libraries in the school are of two kinds. Those in city schools should consist entirely of reference books and a collection of 3000 volumes is sufficient for the largest school. In rural schools there may be a general collection to supply recreational reading. A collection of 500 or more volumes needs a custodian.....If a trained librarian is too great a luxury, a graduate of the school will probably serve for reasonable pay. As the library increases in size in order to increase also in efficiency a trained librarian becomes necessary. She should give her whole time to the library, in and out of school hours, in order that she may apply the technical knowledge gained through her special training to the work of making the library useful in the highest degree."

---

1) Baldwin, E. G. Report of the joint committee representing the A. L. A. and the N. E. A. on instruction in library administration in normal schools. In National Education Association Proceedings, 1906, p. 215-281.

1907.<sup>1</sup> "In conclusion, then, I would say that what is imperatively needed is not for normal schools to train professional librarians for public school libraries for these schools can not afford such luxuries even if they were needed but to train teachers in library methods and in the use of books so that they may manage effectively the public school libraries in connection with their teaching."

1909.<sup>2</sup> "A high school without a library is as impossible as a high school without a laboratory, or a high school without a teacher. As to the size and quality of this library there will be various and varying notions. Certainly it can not be too large and certainly it may easily be too small. There are some few things concerning the library upon which we may quite fully agree. These will be stated. First, it should be informational. It should contain the very best dictionaries, encyclopedias, atlases, gazeteers, books of facts, hand books, indexes, and books of quotations beside the standard reference books and treatises in every subject taught in the high school. Second, it should be inspirational. It should contain books of poetry, fiction, essay, drama, history, romance, art, travel, and biography.....There should be a

multiplicity of school departments is there any other one which could have for an aim the development of the power to take broad views of many subjects without a specialized study in any one?.....To train the mind for broad views is quite as essential as it is to train it for specialized views. Even as we need wide views of life to prepare us for complete living, so the student needs a wide view of what the library has to offer to prepare him for the complete use of his opportunities in the intellectual field."<sup>1</sup>

1916.<sup>2</sup> "Modern high school education is no longer mere book memorization in small daily doses with verbal tests. Its methods, content and purpose have clearly broken over all bounds of mere academicism. It is entering the twentieth century stage responsive to the peculiar and varied educational demands imposed upon it. These demands in turn imply a library organization and equipment correspondingly varied. ....English and history, and I could include almost as well any school subject, can no more be taught properly in our public schools without an adequate library organization than can botany or physics be taught without a laboratory, or manual training or domestic science without shop equipment,

2) Johnston, C. H. Need for an aggressive campaign for better school libraries. In National Education Association Proceedings, 1916, p. 539-543.

or athletics without a field.....More than anything else we need to think the library into our every-day school consciousness. We need to feel that a school library, moreover, is vastly more than merely a collection of even choice books. The modern school has spread into an institution with functions dealing far beyond that of merely intellectualizing the child. It cares for all that pertains to the complete flowering of the pupil's individuality, hygienic, intellectual, aesthetic, vocational, moral, religious. So the modern adequate school library must be, too, an institution for the distribution and display and for the demonstration of all legitimate modern educational tools."<sup>1</sup>

1919.<sup>2</sup> "The high school library of the next decade calls for a librarian of rare qualities and qualifications. She must be more than an instructor in the subject of the use of books. The re-organized library calls for a librarian of wide knowledge and broad outlook; it calls for an individual of originality, of sympathy, of resourcefulness in attacking new problems and in working out new methods of procedure."

"With a library department placed in the Junior and Senior High School throughout the land, organized under the leadership of efficient librarians, and equipped to carry out the objectives of modern education in a democracy, the high school library of the next decade is destined to rise from a

subordinate position to the very center around which all other school activities will revolve, and it will prove to be the unifying factor among all the other departments in bringing about during the next decade the re-organization of secondary education in America."<sup>1</sup>

1925.<sup>2</sup> "In the generous provision which is being made for the equipment to meet the broadening aims of the school, the library should claim a large share. Properly conceived, it is the correlating center of the school's activities. Not only should it contribute directly to the effectiveness of instruction in each subject by providing in accessible form an abundance of supplementary material, but it should also train pupils how to use books effectively.....In addition to its service in the field of classroom instruction, the library may be made a center in which much of the life of the school outside the classroom may find its motive and control."

1928.<sup>3</sup> "The function of the high school library has changed with the changed methods of teaching. Instead of teaching as information-giving and testing, we are substituting the teaching of the child to feel a need for new experiences and to know how to meet that need. Consequently the school

### III Standards for the Administration and Equipment of High School Libraries.

#### A. The N.E.A. Committee on Library Organization and Equipment.

At the annual meeting of the National Education Association in 1915, these progressive educators who were setting high value on the library, voted to appoint a committee to undertake a study of the actual conditions which were to be found in the existing high school libraries of the United States. The following year, upon hearing the report on the problems which the libraries were facing, it was decided that the committee should be re-appointed to continue its work toward a constructive program for library development. The result was the well-known "Certain" report, "Standard Library organization and equipment for secondary schools," first read and approved at the Pittsburgh meeting in 1918.<sup>1</sup> It has since been accepted by both the National Education Association and The American Library Association. Reprinted many times and quoted in practically every manual on school library work this report has been an important factor in attracting the attention of superintendents and principals in every part of the country to the needs of the school library and has served them well as a measuring stick for the libraries in their own schools.

In the report are included standards for Junior and

---

1) National Education Association Committee on Library Organization and Equipment: C.C. Certain, chairman. Standard Library organization and equipment for secondary schools.

Senior high school libraries, both large and small. Because all associations and state departments of education have gone to this as a basis for their recommendations, we are giving in this paper a rather full summary.

The room.      Floor space:

At least 25 square feet for each reader. A seating capacity of from 5-10 per cent of the total daily attendance.

Use:

Should be reserved exclusively for library use and no meeting should be held in it which will interfere with student visitors. Should not be a study room or a place for supervised study.

The equipment.      Indispensable:

Shelving, wall and free standing, books, closet space for storage, tables, chairs, desks, card catalog and pamphlet cases, book truck, exhibit, magazine and newspaper racks.

Additional:

Will be needed for the most effective work. Extra rooms, work room, library classroom, committee rooms.

Librarian:      Qualifications, Personal:

Wide knowledge of books, ability to organize, successful experience in reference work. Enthusiasm, power to teach and inspire. Successful experience in library work with boys and girls of high school age. Added asset: teaching experience.

Qualifications, Training:

General: Degree with major subjects in subjects appropriate to special demands. One year of post-graduate library training in an approved library school and one year of successful library experience in work with young people in a library of standing.

Modifications:

Schools with enrolment of 200 or less: Teacher librarian if necessary. Full time is ideal.

Schools with enrolment of 200-500: Librarian with training and experience. Training: Course in library school or college, state library commission or public library.

Schools with enrolment of 500-700: Full time librarian, college graduate and six weeks training in library methods plus a year of library experience are the minimum. Full time librarian, graduate of high school with course of training plus 2 years library experience.

Schools with enrolment of 800-1000: College graduate and graduate of one year approved library school with at least 2 yrs. experience in library or 1 yr. library experience and 1 yr. teaching. If not college graduate, must have 4 yrs. experience either library or teaching plus 1 yr. in library school.

Schools with enrolment of 1000-3000: Librarian and assistants with full training.

Librarian's salary: Not less than English teacher. In departmentalized school, should equal other departmental heads.

Administrative requirements: Staff large enough to keep library open throughout session and before and after school.

Special modifications:

<u>Enrolment</u>	<u>Librarians</u>	<u>Assistants</u>
Very small	Teacher librarian* if necessary. Full time trained librarian if possible.	
200 and less:	Full time librarian	Pupil assistants
200-500:	Full time librarian	Pupil assistants
500-700:	Full time librarian	Pupil assistants
800-1000:	Full time librarian	Pupil assistants
1000-3000:	Full time librarian	Professional assistants

---

\*Teacher librarian a high school teacher who has had at least a six weeks training course in a summer library school and who is relieved of part of her teaching duties.

Book Collection and Appropriation:

<u>Enrolment</u>	<u>No. volumes</u>	<u>Per pupil</u>	<u>Appropriation</u>
100 or less	1000	10	Regular even though small.
100-200	2000	10	Definite
200-500	2000-3000		Definite
500-1000	3000-8000		400-500; 200-300
1000-3000	5000-8000		500-1200; 300-500

Junior High Schools:

Practically the same requirements except that the librarian shall be the graduate of an approved library school with special training in children's work as well as a graduate of a Normal School or college and shall have had experience in library work with children or school or reference department work.

III B. Standards for the Model High School Library as Stated by the American Library Association.<sup>1</sup>

The American Library Association while it has accepted the "Certain" standards, has worked out further specifications for a model high school library. In the main they agree with the earlier recommendations but there are some details and modifications which have grown out of added experience.

Briefly these are as follows:

Rooms: Near study hall and seating 10-25 per cent of school's enrolment.  
Conference and lecture rooms.  
Librarian's work room with running water.

Equipment: Standard, including adjustable shelving, comfortable chairs and tables, filing and display cases, magazine case and bulletin boards.

Book collection: Approximately 6 books per pupil and providing  
1. Books for ready reference,  
2. Books for supplementing class assignments,  
3. Books and magazines for the leisure hour at home and at school.

Librarian: Large school: Full time librarian who is a college graduate and has completed at least one year in accredited library school.  
Full time professional assistant for every 1000 pupils.

Small school: Full time librarians with above qualifications, or  
(200 or less) Part time librarian who is a college graduate and has completed an accredited library science curriculum of at least 16 semester hrs. and who divides her time between the school library and the public library or between school library work and teaching and devotes at least one-half of each school day to the school library.

---

1) American Library Association Education Committee. School library year book number two, p. 54-55.

Appropriation: Expends for books, \$1.00 a year per pupil enrolled.  
Expends for salaries, amounts equal to those paid  
teachers with equivalent professional training and  
experience.

Provides systematic instruction in the use of books and libraries.<sup>1</sup>

library year book number two, p. 54-55.

### III C. Standards as Stated by the Various Associations of Colleges and Secondary Schools.

With one exception, that of the New England group, all of the sectional associations of Colleges and Secondary Schools have recognized the value of good high school libraries in training future college students and have issued certain minimum requirements which must be met before a secondary school is accredited and placed on the approved list. In many cases they give in full the text of the report of Mr. Certain's committee and recommend that in so far as is possible the schools carry out its suggestions. The following short extracts will indicate the attitude of these associations.

#### Association of Colleges and Secondary Schools of the Southern States.

"The library and library facilities shall be adequate for the needs of instruction in the courses taught. The library should have 500 volumes of well-selected books, exclusive of text books and Government publications."<sup>1</sup>

#### Association of Colleges and Secondary Schools of the Middle States and Maryland.

"The laboratory and the library facilities shall be adequate to the needs of instruction in the subjects taught."<sup>2</sup>

#### IV Some State Provisions for High School Libraries.

In 1927 ten states were each employing a school library supervisor and an eleventh, New York, had two.<sup>1</sup> The state organization of school libraries under the direction of a supervisor has been most important and has resulted in developing and improving these libraries. The State Supervisor can (1) Encourage the establishment in the schools of libraries rather than the mere collections of books, (2) Encourage and develop a system of co-operation of school libraries with public libraries, (3) In co-operation with teachers make out approved reading lists for pupils of both elementary and high school age, for each subject on the school curriculum, and for general cultural reading, (4) Make annual and special reports of the progress of school libraries in the state, (5) Speak at Teacher's Institutes and by means of bulletins keep the teachers of the state in touch with the best books, magazines, government publications, pictures, slides, postal cards and museum material, (6) Furnish architects of school buildings with the best plans for school libraries approved by both teachers and librarians, (7) Give advice and help to the school librarians of the state regarding the technical organization of their libraries, (8) Develop co-operative methods of lending books, cataloging books and other material, etc."<sup>2</sup>

---

1) Koos, F. H. State participation in public school library service, p. 74.

2) Warren, Irene. Some high school problems of interest to teachers and librarians. In Wilson Bulletin 1: 20.

Most of the state supervisors of school libraries are employed by the state departments of education but in a few states the supervisors are members of the staff of the state library commission. In three states, Minnesota, New York and Wisconsin, the supervisors must approve the libraries of the schools which wish to receive financial aid from the state, and in Indiana, New York, Minnesota and Pennsylvania, they inspect school libraries in order to see whether or not the schools shall be approved for standardization or the receiving of state aid.<sup>1</sup>

In many of the other states which as yet have no official supervisor of school libraries, members of the state library commission serve as such, giving assistance and advice to school authorities and librarians, furnishing lists of books for the school library and helping in every way possible.<sup>1</sup>

Thirty-nine state departments of education<sup>2</sup> prescribe for the establishment of high school libraries in their standards for high school approval or accrediting or as a requirement for receiving state aid. Sixteen have set up standards in terms of appropriation, initial costs and expenditure per pupil, but in very few states do these approach the standard suggested by the National Education Association and the American Library Association. In seventeen states the approved high schools must have a book collection ranging from a minimum of 100 volumes to 3000 and eleven states require the school to have a library room. Only

nine states specify that there must be a school librarian who shall have had some special training and eight provide that the librarian shall be responsible for instruction in the use of books and the library.<sup>1</sup>

The fullest and most definite of the state requirements in regard to the employment of a librarian are those given by New York State and for that reason they are quoted below in full.

Present State Requirements. Rules having the effect of state law adopted by the Regents of the University of the State of New York, January 29, 1925.<sup>2</sup>

1. A school having an academic department with an enrolment of not over 100 shall employ as head school librarian a person who holds a school librarian's one year certificate or one of higher grade.

Such head librarian shall devote at least 1 school period each school day to school library work.

2. A school having an academic department with an enrolment of more than 100 and not over 300 pupils shall employ as head school librarian a person who holds a school librarian's one year certificate or one of higher grade.

Such head school librarian shall devote at least 2 school periods each school day to school library work.

3. A school having an academic department with an enrolment of more than 300 and not over 500 pupils shall employ as head school librarian a person who holds a school librarian's three year

certificate or one of higher grade.

Such head high school librarian shall devote at least one-half of each school day to the school library work.

4. A school having an academic department with an enrolment of more than 500 and not over 700 pupils shall employ as head school librarian a person who holds a school librarian's three year certificate or one of higher grade.

Such head school librarian shall devote at least 5 school periods each school day to school library work.

5. A school having an academic department with an enrolment of more than 700 and not over 1000 pupils shall employ as head school librarian a person who holds a school librarian's five year certificate or one of higher grade.

Such head school librarian shall devote all of the school day to school library work.

6. A school having an academic department with an enrolment of over 1000 pupils shall employ as head school librarian a person who holds a school librarian's permanent certificate.

Such head school librarian shall devote all of the school day to school library work.

7. School districts or cities that maintain more than one school with an academic department shall employ as head school librarian for each such school a person who holds a school librarian's

Main body of faint, illegible text, possibly a list or series of entries.

certificate of the grade required by the number of pupils enroled in such academic department.

Each of such head school librarians shall devote such part of each school day to school library work as is required by the numbers of pupils enrolled in each such academic department.

.....

In lieu of the establishment of a school library and the employment of a head school librarian as hereinbefore provided, any school having an academic department with an enrolment of not over 700 pupils may contract for library service with the local free public library if the following conditions are fulfilled to the satisfaction of the President of the University and upon his special written permission.

1. Where such local free circulating library is not more than a quarter of a mile from the school building.
2. Where the collection of books in such library is of suitable quality and of sufficient size to adequately provide for the library needs of the school.
3. Where the person employed as head librarian or director of such library or the person in charge of the library work with the school, holds a school librarian's certificate of the grade required by the enrolment of the academic department of such school.
4. Where the school authorities provide in the school building a reading and reference room in which shall be kept a collection of books suitable for the use of the pupils.

examinations given by an approved library school.

- b. Technical education. One year's full work in an approved library school with the evidence of satisfactory completion.
- c. Alternative. In lieu of the requirements above prescribed in 2b. there may be accepted satisfactory evidence of graduation from an approved teacher-librarian course in any normal school or college for teachers in the state of New York and in addition thereto 2 years of approved experience in a library in a school in which the enrolment in the academic department during such 2 years was not less than 500 pupils; or, a completed course of library instruction of not less than 6 weeks full work in an approved library school or training agency with satisfactory evidence of completion and in addition thereto 5 years of approved experience in a library in a school in which the enrolment in the academic department during such 5 years was not less than 500 pupils.

.....

3. For three-year certificate

- a. General education. Completion of a full course in an approved high school or institution of equivalent standards.
- b. Technical education. Graduation from an approved teacher-librarian course in any normal school or college for teachers in the state of New York; or, a completed course of school library instruction of not less than 6 weeks full work in an approved library school or training agency with evidence of satisfactory completion.

The first part of the book is devoted to a general introduction to the subject of the history of the English language. It discusses the various influences that have shaped the language over time, from Old English to Modern English. The author also touches upon the geographical spread of the language and the role of literature in its development.

The second part of the book is a detailed study of the Old English period, covering the years from approximately 450 to 1100. It examines the linguistic features of Old English, such as its inflectional system and its vocabulary, and discusses the major works of Old English literature, including Beowulf and the Anglo-Saxon Chronicle.

The third part of the book deals with the Middle English period, from about 1100 to 1500. This section explores the changes in the English language that resulted from the influence of French and Latin, and it discusses the development of the English vernacular. Key literary works of this period, such as the Canterbury Tales and Sir Gawain and the Green Knight, are also mentioned.

The fourth and final part of the book covers the Modern English period, from 1500 to the present. It discusses the influence of the Renaissance and the scientific revolution on the English language, as well as the role of the printing press in the standardization of the language. The book concludes with a look at the current state of the English language and its future prospects.

The book is written in a clear and concise style, making it accessible to a wide range of readers. It is a valuable resource for anyone interested in the history of the English language and its development over time. The author's expertise is evident throughout the text, and the book provides a comprehensive overview of the subject.

The book is divided into four main sections, each with its own chapter headings. The first section is the most general, while the subsequent sections become increasingly specific. This structure allows the reader to gain a broad understanding of the subject before delving into the details of each period.

The book is well-illustrated with numerous examples of Old and Middle English text, which are accompanied by modern English translations. This helps to illustrate the changes in the language and makes it easier for the reader to understand the original text.

The book is a well-written and informative work that provides a comprehensive overview of the history of the English language. It is a valuable resource for anyone interested in the subject and is highly recommended.

c. Experience. None required of graduates from an approved teacher-librarian course; all others an approved library experience of 2 years averaging at least 10 hours a week. Such certificate may be renewed from time to time upon evidence that satisfactory work has been done for at least 2 of the 3 years for which the certificate was issued.

.....

4. For one-year certificate

- a. General education. Completion of a full course in an approved high school or institution of equivalent standards.
- b. Technical education. A completed course of school library instruction of not less than 6 weeks full work in an approved library school or training agency with evidence of satisfactory completion.

## V High School Libraries in City High Schools: Types of Administration

In the larger cities of the country, three types of school library administration are to be commonly found.

1. The school library, an integral part of the school system as it is in Detroit, Denver, New York, Los Angeles and Philadelphia, with a school library supervisor who is a member of the staff of the board of education. This supervisor is given authority to select staff for the existing school libraries, plan rooms and equipment in new school buildings, help in every way in the establishment of new libraries and make recommendations as do other members of the supervisory staff.

2. The school library a part of the public library system, as in Cleveland and Jersey City<sup>1</sup> where the major and in some cases the entire expense of the school libraries is borne by the library, the supervisor and the librarians of the schools are members of the public library staff and close and cordial relations are maintained with both institutions.

3. The school library maintained under a system of co-operation as in Pittsburgh where the expense is shared and carefully detailed plans have been drawn up by the two educational institutions of the community. The school librarians are paid by the school board and are members of the school faculty but are supervised by the head of the school department of the public

library who recommends their appointment and makes suggestions for new school libraries.

Each of these systems has worked out successfully. The chief essential is a well trained and experienced supervisor with executive ability and wisdom and a spirit of interest and understanding. Through her efforts is brought about cooperation between the directors of school and library.

The accompanying tables show not only the salaries of the senior and junior high school librarians in some forty-five American cities but give as well some idea of their standing, of the length of their hours and the number of libraries in the schools of each of these cities. It will be noted that statistics from only two of the Massachusetts cities are included and that Quincy which probably has the best school library system in the state is not included. In other respects the table is satisfactory giving data for cities in which outstanding work is being done.

Faint, illegible text, possibly bleed-through from the reverse side of the page. The text is arranged in several paragraphs, but the characters are too light and blurry to be transcribed accurately. Some words are difficult to discern, but appear to be standard English prose.

## VI A. Massachusetts Schools and their Libraries.

Educators in Massachusetts have long realized the value of the school library and yet for some reason little has been done to encourage its growth or to aid in its establishment. Many of the schools seem to feel that a library and a trained librarian are unnecessary frills rather than important essentials. Out of the large number of high schools in the state there are very few which have trained or even full time librarians, adequate library rooms with fairly satisfactory collections and definite appropriations. As will be seen in the tables accompanying this,<sup>1</sup> the majority of schools report that they have libraries and library collections. In very many cases, however, these libraries are housed in corridors, in study halls, in principals' offices or are scattered throughout the various classrooms. Under these conditions the books are not available for constant use. A study of the statistics will show, too, how very few schools have full time librarians and that, of these, still fewer have had special training and experience.

Perhaps one of the explanations for the conditions to be found here is that up to the present most of the schools are of the traditional type, paying special attention to the college preparatory course, priding themselves on the number of students able to pass the College Board examinations and fearing that any broadening of the course might mean a lessening of concentration and that the student might be led away from the lesson.

---

1) Appendix p. 58-107

The first part of the book deals with the early years of the Republic, from the signing of the Constitution in 1787 to the end of the War of 1812. It covers the presidencies of George Washington, John Adams, and James Madison, and the development of the federal government and the states.

The second part of the book covers the period from 1812 to 1848, including the presidencies of James Monroe, James Madison, and James Monroe again. It discusses the War of 1812, the Louisiana Purchase, and the expansion of the United States.

The third part of the book covers the period from 1848 to 1861, including the presidencies of James K. Polk, Zachary Taylor, and Andrew Jackson. It discusses the Mexican War, the Texas Annexation, and the growing tensions between the North and the South.

The fourth part of the book covers the period from 1861 to 1865, including the presidency of Abraham Lincoln. It discusses the Civil War and the Reconstruction period.

The fifth part of the book covers the period from 1865 to 1877, including the presidencies of Andrew Johnson, Ulysses S. Grant, and Rutherford B. Hayes. It discusses the Reconstruction period and the rise of the Ku Klux Klan.

The sixth part of the book covers the period from 1877 to 1896, including the presidencies of Rutherford B. Hayes, James Garfield, Chester A. Arthur, Grover Cleveland, Benjamin Harrison, and Grover Cleveland again. It discusses the Gilded Age and the rise of the industrial revolution.

The seventh part of the book covers the period from 1896 to 1913, including the presidencies of William McKinley, Theodore Roosevelt, and Woodrow Wilson. It discusses the Progressive Era and the rise of the United States as a world power.

The eighth part of the book covers the period from 1913 to 1933, including the presidencies of Woodrow Wilson, Warren G. Harding, Calvin Coolidge, and Herbert Hoover. It discusses the Roaring Twenties and the Great Depression.

The ninth part of the book covers the period from 1933 to 1945, including the presidency of Franklin D. Roosevelt. It discusses the New Deal and the United States' role in World War II.

The tenth part of the book covers the period from 1945 to 1963, including the presidencies of Dwight D. Eisenhower, John F. Kennedy, and Lyndon B. Johnson. It discusses the Cold War and the Vietnam War.

The eleventh part of the book covers the period from 1963 to 1977, including the presidencies of Lyndon B. Johnson, Richard Nixon, and Gerald R. Ford. It discusses the Vietnam War and the Watergate scandal.

The twelfth part of the book covers the period from 1977 to 1981, including the presidency of Jimmy Carter. It discusses the Iran hostage crisis and the Soviet invasion of Czechoslovakia.

The thirteenth part of the book covers the period from 1981 to 1989, including the presidencies of Ronald Reagan and George H. W. Bush. It discusses the end of the Cold War and the Gulf War.

The fourteenth part of the book covers the period from 1989 to 2001, including the presidencies of George H. W. Bush, Bill Clinton, and George W. Bush. It discusses the end of the Cold War, the Clinton administration, and the September 11 attacks.

The fifteenth part of the book covers the period from 2001 to 2009, including the presidencies of George W. Bush and Barack Obama. It discusses the Iraq War and the financial crisis.

The sixteenth part of the book covers the period from 2009 to 2017, including the presidencies of Barack Obama and Donald Trump. It discusses the Affordable Care Act and the 2016 election.

The seventeenth part of the book covers the period from 2017 to 2021, including the presidency of Donald Trump. It discusses the impeachment of Donald Trump and the January 6th riots.

The eighteenth part of the book covers the period from 2021 to the present, including the presidency of Joe Biden. It discusses the COVID-19 pandemic and the 2020 election.

When the newer type of education reaches New England, the high school library must come into its own.

In the smaller schools located in the rural districts there must be a constant struggle to meet expenses. As the statistics show there are 169 junior and senior high schools and 88 school systems<sup>1</sup> with an enrolment of less than 200. It is not surprising that these schools have not been able to secure trained service, and yet with their limited funds they do not rank as far behind the city schools in respect to library facilities as might be expected.

Another explanation for lack of interest in school libraries may be the fact that the private school is so very strong in New England. This has meant that the interest of many of the older American stock is less keen in the public school and that these people who believe in books for themselves and their children do not realize that the children of the newer citizens need the cultural influence of books and that this may be gained through the right books in the right type of school library.

Perhaps, too, some of the fault lies with the public library. Proud because every town in Massachusetts has its library, the librarian has not stopped to consider that many of these are but make-shifts, hardly worthy of the name, poorly financed, badly housed, with book collections, old and dingy and unattractive, with librarians unaggressive and untrained, willing

1) Massachusetts Department of Education. Annual Report, 1929, Pt. II.

THE UNIVERSITY OF CHICAGO

PHILOSOPHY DEPARTMENT

PHILOSOPHY 301  
PHILOSOPHY OF LANGUAGE  
Lecture Notes  
Lecture 1: The Philosophy of Language  
The philosophy of language is the study of the nature and structure of language. It is a branch of philosophy that deals with the relationship between language and reality. The central question of the philosophy of language is: what is the nature of the relationship between language and reality? This question has been debated by philosophers for centuries. Some philosophers, such as Plato, believe that language is a mere tool for communication, while others, such as Wittgenstein, believe that language is a form of life. The philosophy of language has also been concerned with the problem of meaning, the problem of truth, and the problem of reference.

One of the central problems of the philosophy of language is the problem of meaning. What is the nature of meaning? How is meaning related to reality? This is a question that has been debated by philosophers for centuries. Some philosophers, such as Plato, believe that meaning is a form of reality, while others, such as Wittgenstein, believe that meaning is a use of language. The philosophy of language has also been concerned with the problem of truth. What is the nature of truth? How is truth related to reality? This is another question that has been debated by philosophers for centuries. Some philosophers, such as Plato, believe that truth is a form of reality, while others, such as Wittgenstein, believe that truth is a use of language.

Another central problem of the philosophy of language is the problem of reference. What is the nature of reference? How is reference related to reality? This is a question that has been debated by philosophers for centuries. Some philosophers, such as Plato, believe that reference is a form of reality, while others, such as Wittgenstein, believe that reference is a use of language. The philosophy of language has also been concerned with the problem of modality. What is the nature of modality? How is modality related to reality? This is another question that has been debated by philosophers for centuries. Some philosophers, such as Plato, believe that modality is a form of reality, while others, such as Wittgenstein, believe that modality is a use of language.

The philosophy of language is a complex and challenging field of study. It is a field that has attracted the attention of some of the greatest philosophers of all time. The philosophy of language is a field that is constantly evolving and changing. It is a field that is full of interesting and important questions. The philosophy of language is a field that is worth studying and exploring.

but lacking the educational and technical background which is necessary. School authorities in many towns in Massachusetts have had little opportunity to see what a live library can accomplish in a community and therefore fail to recognize the inadequacy of their own pitiful collections.

None of the cities of Massachusetts have centralized school library supervision and in a city as large as Boston the need is very apparent and the lack of a centralizing agency, a great handicap. Each school library is a law unto itself, dependent upon the attitude of the principal and teachers for support. We find well equipped library rooms with part-time over-worked teachers in charge, with books unclassified, uncataloged and in need of repair, libraries to which students remember "going only two or three times" during the four years which they spent in the school, and of which they complain that they can never find there the books which they need.

Very many of the libraries are inadequately supplied with funds for new books and some have to depend entirely upon the generosity of pupils, upon school entertainments, gifts from the senior class or the money earned by members of the library club who sell candy at football games.

The members of the State Educational Department are awake to the needs and they recommend improvement of library facilities in several of their reports. In the 1923 report<sup>1</sup> we find this statement. "A very important aid to good work is an adequate and

Faint, illegible text, possibly bleed-through from the reverse side of the page. The text is too light to transcribe accurately.

well selected school library. It is expected of course that all high schools will use the public library as much as possible, but the public library, even when well equipped with reference and other books suitable for the use of pupils in the high school is not a substitute for a good library in the school building accessible at all times to the pupils and teachers. An examination of many high school libraries in the state by the supervisor of secondary education has shown, almost without exception, that these libraries are inadequate for the service they ought to render." And again "The Department of Education is greatly interested in improving the reference libraries in the high schools of the State. A good library in the school, at all times easily accessible to teachers and pupils, is necessary. The library must be the working laboratory of most of the departments. This is essential for the employment of the best methods of instruction and for the securing the best results of such instruction. The quality and size of the high school library still leaves much to be desired."<sup>1</sup> In the same report, the department has tentatively suggested that "there shall be four volumes per pupil up to five hundred pupils and one volume per pupil in excess of five hundred. This is a minimum standard and should be understood to mean carefully selected, usable books, exclusive of text books. In 1924-25 there were only 41 high schools out of 233 which met the above standards even without any consideration of the kind and quality of the books

reported. A policy of adequate annual appropriations for reference books is a serious need.....In order that the best results may be obtained from the library, it is also important in the larger schools that there be a trained librarian. In the smaller school some teacher or teachers should be given time from their regular program to carry on as well as possible the work of the librarian."<sup>1</sup>

The Library Division of the Department of Education is greatly interested in the extension and improvement of school libraries and is always ready to give advice and aid. It has compiled several lists for school libraries but is prevented from giving as active service as it desires by lack of money, time and assistants. The department can recommend only and cannot require that a library be a regular feature of every school.

The first part of the book deals with the early years of the Republic, from the signing of the Constitution in 1787 to the end of the War of 1812. It covers the presidencies of George Washington, John Adams, and James Madison, and the development of the federal government and the states.

The second part of the book covers the period from 1812 to 1848, including the presidencies of James Monroe, John Quincy Adams, Andrew Jackson, and Martin Van Buren. It discusses the expansion of the United States, the growth of industry, and the rise of the Jacksonian era.

The third part of the book covers the period from 1848 to 1876, including the presidencies of Zachary Taylor, Millard Fillmore, Fremont, and James Buchanan. It focuses on the Mexican-American War, the gold rush, and the beginning of the Civil War.

they have library rooms but that they do not use these rooms, and 2 are planning to have libraries.

Only 32 of the senior high schools<sup>1</sup> and 8 of the junior high schools<sup>2</sup> report that a full-time librarian is in charge of the school library. In 3 school systems, the school librarian divides her time between junior and senior high school, and in 5 schools some library service is given by the local public library. Four of the librarians listed as full-time librarians have no teaching schedules but carry various administrative duties. One supervises the preparation for college, normal and textile schools, 3 are Deans of girls with additional duties such as supervision of dramatics and of preparation for college, etc. In 1 case, it is said that the librarian is "present but spends much time on administrative duties." Only 1 high school<sup>3</sup> reports having both a full-time librarian and an assistant.

Eleven of the high school librarians have had a full year's course in an accredited library school; 17 have had either short courses in normal schools, summer schools, in public library training classes, or have had some experience in public libraries. The others had had neither training nor experience when appointed to their present positions. Twenty-nine of the 32 full-time librarians in the senior high schools give library instruction and 4 report that they are conducting library service clubs.<sup>4</sup> Twelve belong to the American Library Association. All of the full-time librarians are in schools which have enrolments of more than 200.

Faint, illegible text covering the majority of the page, likely bleed-through from the reverse side.

In the smaller schools and in most of the larger schools, the library has been placed in charge of a teacher without library training or experience. One high school has engaged a librarian who gives  $\frac{5}{6}$  of her time to the library and  $\frac{1}{6}$  to the teaching of history. Three teachers who are carrying schedules of from 17-25 hours a week have been sufficiently interested in their library work to take summer school courses in this field. In a few schools the programs of the teachers assigned to the libraries have been lightened but in the majority of schools the supervision of the library is added to the already heavy burden of the teacher. In the latter case, as little as  $\frac{1}{40}$  of the time, or less than one hour a week, may be given to the library. In 3 schools the work is divided between two teachers. In 7 other schools the principal reports that he is in charge. In 5 schools all of the teachers in turn are assigned to the library. Twelve school libraries are cared for by students. Two are conducted by clerks. The school experience of the teacher librarians varies all the way from none at all to 48 years.

Twenty-one of the schools having more than 500 pupils meet the "Certain" requirements in respect to the seating capacity of the library. In the smaller schools the library is usually in the study hall, a procedure not recommended since it means that there is less access to books, that greater formality exists, and that the interest of the librarian is divided.

Only 4 schools with enrolments of more than 1000, have

The first page of the document is a title page, followed by a preface or introduction. The text is arranged in a single column and is written in a formal, serif font. The content appears to be a historical or legal document, possibly a treaty or a set of regulations. The text is dense and covers most of the page area, with some lines of text appearing to be indented or set off from the main body. The overall appearance is that of a formal, printed document from the late 19th or early 20th century.

rooms seating 5% of the pupils. In one of these the attendance is limited at least 1/3 because the librarian feels that it is impossible to have more than 80 or 90 pupils in the room at one time, unless she has some assistance.

Some of the school librarians are doing excellent work and are making their libraries the center of the school even though they are hampered by lack of books, money, assistants, and room. There is not one school library in Massachusetts, however, which can be classed with the outstanding school libraries of the country. Before the Massachusetts high school libraries can take a high rank it will be necessary to arouse a library consciousness among school boards, superintendents, principals, teachers, pupils, and parents. Something has been accomplished through the annual reports of the Massachusetts Department of Education, which have stressed again and again the value of well-chosen collections of books. A more vigorous campaign is needed.

A small per capita grant from the state, carefully guarded and restricted, would encourage school authorities to build up the libraries. This method has proved helpful in the last few years in Iowa and Wisconsin and would be as welcome in Massachusetts.<sup>1</sup> The appointment of a supervisor of school libraries as a member of the staff of the Department would stimulate their development. As the state library commission is now known as the Library Division of the Department of Education this appointment should not be difficult to effect.

1) A. L. A. Education Committee. School library year book number two, p. 52-56.

Faint, illegible text at the top of the page, possibly a header or title.

Second paragraph of faint, illegible text.

Third paragraph of faint, illegible text.

Fourth paragraph of faint, illegible text.

Fifth paragraph of faint, illegible text.

Sixth paragraph of faint, illegible text.

The qualifications and duties of the Supervisor should be clearly defined. She should be a mature person with good judgement, with an educational background and experience equivalent to that of the average principal and superintendent with whom she will work. She should be a graduate of a fully accredited library school and should have had adequate and successful experience as a high school librarian or as a head of a department for work with schools in some well-organized library. She should have a sound knowledge of educational methods and principles as well as of the technical skills of the library profession.

Her duties at first would be chiefly inspirational and later advisory. Until Massachusetts requires certification of teachers in other than state-aided schools or classifies the schools according to the grade of work done by them, the supervisor can not make positive requirements but she can work out definite standards and encourage the schools to work toward them. The supervisor should inspect and approve of the library facilities in schools requesting state aid.

Through visits to schools, through addresses at teachers' meetings, through articles in school magazines, and through personal conferences, the supervisor can aid in making the book collections, in the planning of rooms and equipment, and in the selection of the librarians. Many of the principals are desirous of having school libraries and would welcome the assistance of a supervisor who would work with them in arousing the interest of the superintendent and the board.

The text on this page is extremely faint and illegible. It appears to be a multi-paragraph document, possibly a letter or a report, but the specific content cannot be discerned. The text is arranged in several distinct blocks, suggesting a structured format. The overall appearance is that of a scan of a document with very low contrast or significant fading.

The situation is not peculiar to Massachusetts. Similar conditions are to be found in certain other states. Massachusetts, however, has a fine tradition to uphold and, instead of lagging behind with the more backward states, she should be forging ahead, a leader, not a follower.

## APPENDIX

Tables showing library facilities in  
the high schools of Massachusetts  
and the training and qualifications  
of the high school librarians.

1. Tables of statistics for senior high schools giving statistics of library rooms, collections and hours of library service.

Maynard	450	Yes	5/7	.....	2½ per daily	430	4	1	4	17	.037
Methuen	407	Used as classroom	.....	.....	.....	200	...	...	...	...	....

Faint, illegible text, possibly bleed-through from the reverse side of the page. The text is arranged in several columns and rows, but the characters are too light and blurry to be transcribed accurately. Some faint words like "THE" and "AND" are visible.

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be clearly documented and supported by appropriate evidence. This includes receipts, invoices, and other relevant documents that can be used to verify the information recorded.

The second part of the document outlines the various methods used to collect and analyze data. It describes how different types of information are gathered, processed, and then used to draw conclusions. This involves a systematic approach to data collection, ensuring that the information is reliable and valid.

The third part of the document focuses on the interpretation of the results. It explains how the data is analyzed to identify trends, patterns, and anomalies. This step is crucial for understanding the underlying meaning of the information and for making informed decisions based on the findings.

The final part of the document discusses the importance of communication and reporting. It highlights the need to present the results in a clear and concise manner, using appropriate visual aids and language. This ensures that the information is easily understood and can be effectively used to inform decision-making.
