In the 2020s, 57% of autistic people

- normal intelligence...
- may do well in school...
- hold down jobs...
- pass for normal
- ...but often navigate sensory and

This phenotype exists because of the re-
inventions of traits like these:

- attention to detail
- systemizing
- do-it-myself tinkering,
- discovering
- inventions
- computer programmers, engineers

What then produces classic autism (as in p
